

# DHARANI MUNAKALA

## WEB DEVELOPER

Visakhapatnam, Andhra Pradesh | dharanimunakala@gmail.com | +91 9347930053

### SUMMARY

Computer Science undergraduate with hands-on experience in Full Stack Development and Machine Learning. Strong foundation in data structures, algorithms, NLP, and web application development. Experienced in building responsive web applications and implementing ML models using Scikit-learn and Python. Seeking entry-level Software Engineer, Web Developer, or AI/ML Engineer roles to contribute to scalable, user-focused solutions.

### EDUCATION

|                                                           |             |
|-----------------------------------------------------------|-------------|
| <b>B.Tech - Computer Science and Engineering</b>          | 2022 - 2026 |
| Baba Institute of Technology and Sciences   Visakhapatnam |             |
| <b>Intermediate(MPC)</b>                                  | 2020 - 2022 |
| Sri Chaitanya Junior College   Visakhapatnam              |             |
| <b>10 - SSC Board</b>                                     | 2009 - 2020 |
| KEMS School   Visakhapatnam                               |             |

### PROJECTS

#### AI-Powered ATS Resume Checker

- Designed and deployed a resume-job description matching system using TF-IDF and cosine similarity.
- Implemented keyword extraction using spacy for intelligent scoring.

#### Personal Portfolio Website

- Developed a fully responsive portfolio website optimized for mobile and desktop.
- Applied clean UI/UX principles to present technical projects effectively.

### INTERNSHIPS

|                                                                                                                                                                                                                               |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Machine Learning Intern</b>                                                                                                                                                                                                | Apr 2025 – Jul 2025 |
| <ul style="list-style-type: none"><li>Built supervised learning models using Scikit-learn to solve structured prediction problems.</li><li>Performed data preprocessing, feature engineering, and model validation.</li></ul> |                     |
| <b>Full Stack Development Intern</b>                                                                                                                                                                                          | May 2024 – Jul 2024 |
| <ul style="list-style-type: none"><li>Developed responsive UI components using HTML, CSS, and JavaScript.</li><li>Optimized front-end performance and ensured cross-browser compatibility.</li></ul>                          |                     |
| <b>Artificial Intelligence Intern</b>                                                                                                                                                                                         | Aug 2025 – Oct 2025 |
| <ul style="list-style-type: none"><li>Integrated AI-based features into web applications.</li><li>Applied NLP techniques for real-world automation use cases.</li></ul>                                                       |                     |

### TECHNICAL SKILLS

|                                |                          |                                      |
